

KLEBO KG-150 CONTACT GLUE SPREADER

For clean, quick application of solvent-based contact adhesives, look no further than the hand-held **Klebo Contact Glue Spreader**. Both skilled & unskilled workers can apply a regular, thin film of adhesive to large or small panels fast & efficiently.

Advantages of the 150mm Klebo Spreader

- 20-30% savings can be achieved during application when compared with normal hand-applied spatulas.
- Considerable time saving.
- Always ready to use.
- Automatic stopper allows storage of adhesive within unit.
- No loss of solvent through evaporation whilst in use.
- 150mm wide with variable width capability.

The **Klebo Contact Spreader** combines an exchangeable twin spatula that has a fine-toothed side for smooth, solid surfaces or a coarse-toothed side for uneven or highly porous, absorbent surface. Quick & easy to convert!
